The Integrated Food Security Phase Classification (IPC) is a standardized tool that aims to classify the severity and magnitude of food insecurity. The IPC scale, which is comparable across countries, ranges from Minimal—IPC 1—to Famine—IPC 5.

The map only depicts levels of acute food insecurity in countries affected by the desert locust. FEWS NET data is not currently available for Djibouti or Eritrea.

The boundaries and names used on this map do not imply official endorsement or acceptance by the U.S. Government.
